

News release

**AEEI is studying “the Utility of Environment Stock Index” and begins the recruitment of researchers in the U.S. and around the world**

June 21, 2021. American Environmental Energy, Inc. (symbol: AEEI), a public company in Wall Street, is starting an exploratory research program that reflects the utility of environment (UE) of the public companies whose stocks are listed on NYSE, NASDAQ, and OTC Markets. The target is to formulate a “UE stock index,” as NASDAQ 100 index for NASDAQ markets. The work is going to set a foundation of new financial products, including the development of “UE stock index future contract” and “UE stock index investment funds.” The purpose of the program is to provide one more choice for the investors and the financial sector, and presents the investment criterion other than EPS hence challenging the traditional investment philosophy.

The Research of the website [www.laeei.com](http://www.laeei.com) published *A Study Approach of the Utility of the Environment (UE) of the Public Companies on NYSE, NASDAQ, and OTC Markets—A foundation to create “UE stock indexes future contract” and “UE stock index investment funds”* by Dr. Wenyi Yu, the Director of EFI.

AEEI welcome partners from The U.S. and around the world, including security exchanges, future commodity exchange, NGO in environmental protection, investors, financial research institutions, and universities.

AEEI Environmental Finance Institute (EFI) leads the research project. It enthusiastically invites colleagues from all over the world, including professors, researchers, engineers, policy researchers, editors, government officials, investors, economists, mathematicians, new graduates and students in environmental protection, securities, and futures trading, future commodity contract R&D, investment funds, and other financial fields as well as computer science.

The project plans a 100-member team. Some of these members are volunteers and provide unpaid work. A few specific studies are paid.

Online researchers and partners, if qualified, are also welcome.

A biography is requested if you are interested in the project.

We would like to receive your information at [info@laeei.com](mailto:info@laeei.com).

AEEI welcomes the comments on the program by its stockholders.
